

# Wheel of Gratitude Spinner

To make your mini Wheel of Gratitude spinner, simply print out the hexagons onto card (or paper, then stick it to card). Use our coloured one, or colour your own.

You can use a cocktail stick, or a pencil as the axle. carefully pierce the axle through the hexagon, on the centre dot.

Be careful not to poke yourself! You can temporarily put a lump of Blu-tack or Plasticine on the back of the hexagon to make the piercing safer.

Then give it a spin to help you choose a subject to develop your Attitude of Gratitude!

Don't spin on a delicate surface such as a polished table - put something down first.

Colour me in!
